

I would like to keep KLOVE broadcasting just as it is today. As a resident of the local community, KLOVE serves me well with its positive and family friendly content. I can listen to its, news, weather and music without worrying what my kids may hear. It offers information I want to have.

If KLOVE was displaced by a more local channel, it would not benefit me at all. There are many local channels and plenty to choose from. There are very few choices like KLOVE. It is a station that has bonded together churches, organizations and families looking for the same positive message in airways full of negative and various choices.

It is also wonderful when traveling. You can hear KLOVE across the country and the world. When you hear the familiar voices and broadcast, it provides comfort and linkage to your home. Likewise, when two friends or family members can listen to the same channel at the same time, it transcends the distance between them.

Please keep KLOVE broadcasting as it is now. It is in the public's interest to remain so. They can do the work of many stations with less overhead than opening multiple stations around the country. This enables more people to hear it. And the airwaves are one of the truly free sources of information and music left for those who cannot afford other means of getting this information.

Thank you for your time. If I can offer any further assistance, please contact me at jrfowler@midlands.net or 712-786-1248.

Sincerely,
Jacki Rennie-Fowler
